# INTRODUCTION

The Cryptocurrency market today comprises a multi-billion-dollar industry. Though, it is yet to be accepted by the masses as a tool for everyday exchanges, comparable to your standard fiat currency such as the dollar or euro.

While currently holding a market share of more or less than 1.2% in current exchange currencies, it is expected to see rapid growth during upcoming years. We established [NEXT.Exchange](#) because we believe in the potential of cryptocurrencies and that through their application, corporations may find an easy and efficient way of receiving financing for their projects by utilizing what is known as an ICO (Initial Coin Offering). Our vision at [NEXT.Exchange](#) is to allow companies to finance their activities as easily and securely as possible by utilizing digital currencies for project development and service development. Currently, we are designing and constantly upgrading a fresh, new platform for cryptocurrency exchanges, trades, and conversions into foreign fiats.

Large capital acquisitions through ICO's, combined with an increasing public acceptance of cryptocurrencies as a medium of trade, will provide start-ups and investors alike with opportunities for rapid project development and expansion. However, the market potential for cryptocurrencies is yet to be fully realized. We at [NEXT.Exchange](#), are currently developing a platform which will provide investors with an opportunity to participate in token crowd sale via [NEXT.Exchange](#) at [www.NEXT.exchange](http://www.NEXT.exchange)

## THE CRYPTOCURRENCY UNIVERSE

# NEXT.EXCHANGE

## EMBRACES

### BLOCKCHAIN TECHNOLOGY

Incorporated in the Netherlands, [NEXT.Exchange](#) is a next generation stock exchange committed to offering alternative financing and non-banking asset management solutions outside of traditional financial systems and banking establishments. Unlike them, we place all assets straight into the Blockchain ledger.

We offer our clients a broad range of trading and advisory services, regarding mergers and acquisitions, restructuring, and strategic topic clarifications for organizations, shareholders, management, private equity houses, and solo investors.

Our mission is to provide top of the line consultation services and guidance for our clients in order to assist them in making the best financial decisions and to reach their investment and financial goals.

## HISTORY

Our team is composed of highly professional and motivated entrepreneurs with expertise in a plethora of different fields. Individually, they have founded several companies and led various projects, some successful, some fell short of reaching their target. Thanks to this and our combined experience in developing and managing businesses has allowed us to obtain invaluable knowledge regarding the ins and outs of business development from conception to conclusion.

We are among the unheralded men who took up the task of researching the new technology known as the Blockchain, going way back as far as 2012, when only very few believed in it. Furthermore, we have grown in technical maturity and insight as to developing a business and providing financial service guidance and solutions utilizing our own in house Blockchain technology. We wholeheartedly believe in Blockchain technology.

We are capable of providing a boost for well-rounded people who utilize technology in order to deliver business breakthroughs, while maintaining easy access to shares and dividends from companies around the globe. Purchase and sell shares in just a few clicks.

Thanks to [NEXT.Exchange](#), security, professional expertise and quick, headache free access to financials will become the new global standard. We strongly believe that everyone and everywhere should have access to professional corporate finance tools.

# MEET THE TEAM

## BEHIND NEXT.EXCHANGE

### AT **NEXT.EXCHANGE** WE ARE DEVELOPING A NEW KIND OF STOCK TRADING PLATFORM.

AFTER BEING FOUNDED IN 2012, OUR COMPANY HAS ACQUIRED OVER 1000 MEMBERS AND ACCESS TO WORLDWIDE CAPITAL AND PROJECTS.

IN 2018, WE OFFICIALLY REGULATE OUR SERVICES AND WILL BE LAUNCHING A WORLDWIDE STOCKMARKET WITH UNIQUE FEATURES FOR FIAT, CRYPTOCURRENCIES, PHYSICAL AND DIGITAL ASSETS.

#### **CHRISTIAAN VAN STEENBERGEN**

Founder, CEO & Software Engineer

Christiaan is an experienced entrepreneur who has spearheaded several businesses in the telecom, software and fin-tech industries. Today, his entrepreneurial spirit drives him towards the development of new technologies with a dedicated focus towards cryptocurrency software, big data and Blockchain, which will completely change the financial markets.

#### **GLEB JOUT**

Blockchain Consultant, Content & Strategy Manager

Gleb has over three years of managerial and financial experience. His impeccable communication skills, restlessness, strategy, and understanding of the Blockchain Industry provides us with the necessary tools and experience to assist NEXT.Exchange on our journey towards becoming one of the globes best exchanges.

#### **MR. ROB VAN DIJK**

Lawyer & Head of Legal Operations

Rob Van Dijk, has acquired almost over two decades of experience as an attorney, representing individuals and business in the areas of contract law, general commercial business practices, financial law, labor law, debtor/ creditor law and corporate law. Currently, Rob serves as a registered attorney for the Dutch Bar (Nederlandse Orde van Advocaten NOvA). He is also the owner and managing partner of the renowned law firm, LEXIUS.

#### **DRS. CHRIS HAVEMAN**

Business Strategy Operations

Drs. Chris Haveman is a graduate of the University of Leiden, specializing in mathematics, computer science and with a concentration in psychology. His broad experience as an executive chairman on supervisory boards for various multinational corporations such as Boer & Croon (One of the top corporate finance houses in the Netherland region) has brought him the opportunity to provide professional strategic guidance as **NEXT.Exchange's** capital market reform specialist.

# OUR STRATEGY

Our goal is to become the NEXT generation stock trading platform builder utilizing Blockchain technology, deliver unparalleled value propositions for new users, and strong returns for investors. Ultimately, we wish to drive the creation of a new financial ecosystem grounded in the interactions between assets and Blockchain technology.

Our mission is to foster and enhance the adoption of cryptocurrencies as a medium of exchange for global stock trading. We will achieve this by increasing the awareness and educating the general population on the safety and advantages of utilizing digital currencies and Blockchain technology.

We at **NEXT.Exchange** believe that the time has come for businesses around the world to adopt Initial Coin Offering (ICO) practices and gain easy access to stock markets. Due to all of the regulations and boundaries currently enveloping financial markets, it has become increasingly more difficult for fresh startups and even existing companies to enter financial markets, we believe that “Wall Street” does not have the necessary expertise on the subject matter, and cannot provide such individuals and organizations with the necessary guidance to enter modernized financial markets. **NEXT.Exchange** has the required tools and expertise in the form of easy access to rapid funding, professionally tailored teams, and impeccable support services to provide companies and startups with the opportunity to experience positive growth and development.

Our aim is to minimize the hassles and unnecessary limitations of bureaucracy and build an easy-to-use, full-proof platform for the masses. We want to provide a solution for business to easily access corporate financing solutions, and for the public to obtain in startups and profit-based companies around the world without unnecessary headaches. The platform we developed is a fully functional alternative to the stock exchange markets which are currently being dominated by EuroNEXT and Wall Street.

# OUR GOALS

To provide an exchange platform between fiat-, cryptocurrencies, real assets (like company shares) and digital assets with a large, active, and friendly community.

Offer new ways for clients to turn a profit by mimicking expert practices, for example a mobile application where traders can copy trades from successful traders.

To provide an exchange platform for physical goods in which business can exchange their items in a fast and secure manner.

## **NEXT.EXCHANGE** IS CONSTANTLY IN PURSUIT OF NEW TECHNOLOGIES

AND TO ADVANCE THE FINANCIAL MARKET EXPERIENCE FOR OUR CLIENTS.

WE ADAPT OURSELVES TO FUTURE TECHNOLOGICAL GOALS.

# WHAT IS NEXT.EXCHANGE CAPABLE OF?

Currently, our platform enables users to sell and purchase stocks utilizing bank transfers and cryptocurrencies. During the first year of our launch, we plan to make our services available to clients located in the European Union, United States, and Russia. In the second year of operations, clients based in Latin America, Asia, and Australia will be able to utilize our platform. We then plan to bring our services to other developing countries.

**NEXT.Exchange** ensures the safety and security of client funds by utilizing cold storage methodologies, backed by trust and smart contracts, in which we have very strict rules and guidelines pertaining to seller selection, thus, providing buyers with confidence, and trust in our services. During the first phase of our rollout, **NEXT.Exchange** will be integrated with the Ethereum platform. We then plan to migrate our codebase to our own Blockchain platform which can handle large transaction volumes.

We believe that our organization can draw large benefits from the many features that Blockchain technology can offer. Our final objective is to create an exchange platform for business through which shareholders can receive dividends on their stocks, with a fluid and easy to use interface.

## SHORT-TERM TARGETS

**ACQUIRING** all of the necessary permits and license to operate as a stock exchange within countries in which this sector is heavily regulated by governmental law.

**FOCUS** on driving strong and stable user growth, targeting those users who are already familiar with the functionality of stock exchanges as well as those who are just beginning to develop an interest. We plan on achieving our user growth targets via social media campaigns.

## LONG-TERM GOALS

**ACQUIRING** at least a **20%** market share in the stock exchange sector; growing into a fully-fledged platform for trading.

**INVEST** heavily in production and service development to ensure that **NEXT.Exchange** can provide the best technological platform solutions in today's highly competitive industry.

**EXPAND** business operations globally, solidify our presence and strong brand awareness in key regions of the world.

# WHAT ARE NEXT.EXCHANGE INNOVATIONS?

Combining finance with the cryptocurrency world is a unique and challenging process. At **NEXT.Exchange** we are targeting experienced professionals as well as newcomers into this field. To us, security is the most important aspect of business practices. This is why we integrate platforms like Trezor<sup>TM</sup> and Civic<sup>TM</sup> into our exchange as well as other similar smart technologies to provide our clients with the highest guarantee of security available on the market.

# OUR UNIQUE FEATURES INCLUDE

## POOL TRADING

Our platform is capable of handling high trading volumes and providing users with the necessary tools to obtain substantial profits from their trading and exchange actions. Pool trading will help users spread risk over a wide range of assets while participating in the cryptocurrency and fiat market.

## COMMUNITY TRADING

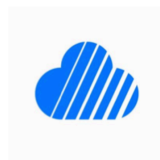

We are capable of providing users with a platform to which they can upload their smart contracts in order to participate in an active smart contract community for trades, business, services, and increased exposure.

## COIN AND TOKEN VOTE IN

New and existing cryptocurrencies can be submitted for consideration by our community users via [www.nextexchange.featureupvote.com](http://www.nextexchange.featureupvote.com) If we see a digital asset getting a considerable amount of support from its user base, we will carry out due diligence and make a decision pertaining to listing said asset.

## SOCIAL NETWORK FOR ICO'S

All of the ICO's listed on our platform will have their own profile, through which our community members can get in touch with the team behind the ICO, as well as get direct updates and news from the ICO. Similar to Facebook, imagine a social profile for ICO's. All of the ICO's listed on the NEXT platform will have their personal profile, through which their community members and [NEXT.Exchange](http://NEXT.Exchange)

# OUR UNIQUE FEATURES INCLUDE

## CRYPTO MINING

Users will be granted the option of investing funds in mining pools. Mining pools work on a constant, passive earning model. Considering that the cash power of mining pools will be more or less equal. Returns on investments from the mining of new coins will be split among investors.

## COLD AND SECURE STORAGE OF FUNDS

We have nullified the threat of cyber-attacks and hacking threats thanks to the utilization of cold storage methods. Clients will be able to use the Trezor device in order to store money securely and safely, via two-factor authentication and other security validation methods.

## SERVICES TAILORED TO INEXPERIENCED USERS

Our system provides inexperienced traders the opportunity copy and learn from the actions and decisions of more experienced traders. New traders can benefit from the expertise and knowledge base of experienced market practitioners. For traders who simply do not have any spare time to devote to market and trading research, [NEXT.Exchange](#) will provide an Auto- Trade tool. This is a feature that automatically follows the actions of top traders based on current and historical performance. Auto Trade is the safest, automated trading method, and will be implemented in the [NEXT.Exchange](#) investment fund.

## MANAGED INVESTMENT PORTFOLIOS

[NEXT.Exchange](#) will provide its users with fully managed investment funds by linking them with licensed investment brokers that are registered with the Dutch AFM and those with a strong background in banking and corporate finance.

# OUR UNIQUE FEATURES INCLUDE

## TRADER ADVANTAGES

Users will be granted the option of investing funds in mining pools. Mining pools work on a constant, passive earning model. Considering that the cash power of mining pools will be more or less equal. Returns on investments from the mining of new coins will be split among investors.

## REFERRAL PROGRAM

Our referral program is designed to benefit both, invitation senders, and recipients. A bonus system will be implemented that will allow users to receive rewards once they recruit new users to the platform. This ensures that new users are introduced so that [NEXT.Exchange](#) trading volume grows.

## FIAT AND CRYPTO SWAPS

Instant swaps between crypto and fiat will be implemented. We will start with USD and EUR, with more to follow as we move along.

## PAYPAL SERVICE INTEGRATION

Oh yeah, we also plan on integrating PayPal's services with our exchange at a later date.

# PERMITS & REGULATIONS

Conducting operations of a stock exchange is vastly different from any other business practice due to the fact that capital is not only required to fund growth and trade cycles, but also for regulatory aspects and requirements.

These regulations are in place to ensure that financial institutes experience minimal risks of financial distress during economic hardships during which high pressure is evoked on an institutes deposit base (quantity of withdrawals outnumbered deposits).

Therefore, most of the capital that will be raised will be put into a trust fund (Foundation) that is supervised by the Dutch AFM (Authority Financial Markets) in order to satisfy optimal capital adequacy requirement ratios, which are legislated and required in order to obtain operating licenses in new jurisdictions.

# REGULATORY REQUIREMENTS

Proper licensing is one of the key aspects of being a fully functional financial institution. The team behind [NEXT.Exchange](#) perfectly understands that exchanges are one of the most vulnerable parts of the cryptocurrency environment. However, [NEXT.Exchange](#) expects to acquire its investor license (beleggersvergunning) after the pre-ICO period.

This will provide us with a solid foundation to provide our planned services and the ability to offer investment products and services without satisfying the following established industry restrictions:

Investments are offered to less than 100 clients.

The investment object being offered is part of a series with fewer than 20 investment objects.

The value of the investment object is incapable of being determined according to regulations.

The investment per object is greater than or equal to € 100,000.

Although the current crypto coin market is decentralized and does not yet fall under full governmental regulations. The United States SEC has expressed plans to regulate ICO's and cryptocurrencies in the foreseeable future, while other countries are banning them or carry a strict disposition.

We expect that cryptocurrency regulations will be implemented and therefore we want to be ready to face these obstacles and bind the market under the [NEXT.Exchange](#) platform in the form of:

Providing licenses to credit unions and crowdfunding platforms.

Maintaining a deposit of over €100 million in a secure Trust.

Opening credit and debit accounts for our clients, without restrictions.

Investing in innovative cryptocurrency developments.

Lobbying with government institutes about the possibilities that Blockchain has to offer.

<sup>1</sup> 'Congress submits bill making it illegal to hold cash, Bitcoin, or other assets outside of a bank without informing them in writing'

[www.congress.gov](http://www.congress.gov)

# SERVICES TO BE OFFERED

## INSTANT ICO DEPLOYMENTS

Currently, an Initial Coin offering is a very time-consuming and strenuous process, which may take months of hard work to fulfill. [NEXT.Exchange](#) will provide users with fully automated API web services in which ICO token sales can be launched almost instantaneously. We will provide a ready to go programming code so that ICO's may be launched the same day as a request is filed, accompanied by a target audience list, and automated marketing procedures implemented to attract investor attention to new prospective ICO's.

Considering that [NEXT.Exchange](#) will provide all of the necessary services, token supplies, smart contracts, and legal documentation, we will impose a small fee of 5% for our services.

## CRYPTOCURRENCY CROWDFUNDING

Since the founding of Kickstarter, crowdfunding markets have developed into an industry with over \$2.5 billion+ active assets. Compared to crowdfunding, the current cryptocurrency market volume is even greater. Despite being relatively new, the ICO market has already overpassed Kickstarter's volume. This is rather impressive considering that the market is still in its early stages, with a ridiculously high ceiling for crowdfunding and profit generation. We at [NEXT.Exchange](#) believe that ICO's will replace IPO's in the near future due to developing technologies and old business practice obsolescence. ICO's will provide small to large sized companies with rapid financing solutions, and liquidity at such a rate, that IPO's will soon lose their entire appeal and competitive advantages from the mass medias perspective.

The [NEXT.Exchange](#) platform will be able to support most popular cryptocurrencies, included and not limited to Bitcoin, Dash, Ethereum (ERC20 as well), NEM, and the [NEXT.Exchange](#) (NEXT) token for all payment related features. [NEXT.Exchange](#) clients will be able to easily participate in international crowdfunding projects with optimal comfort and asset security.

# SERVICES TO BE OFFERED

## NEXT GENERATION STOCK MARKET EXCHANGE

In connection with the crowdfunding market, we want ICO's to be readily tradeable and offered as a base for various investment solutions for individual clients as well as businesses. In the initial stages, low-cost equity traded funds (ETF's) will be offered, followed by trading, advisory, brokerages, custody trades, wealth management and others. Most of our services, such as advisory and wealth management solutions will be developed in-house so our users will have the best experience.

For corporations, [NEXT.Exchange](#) will initially offer treasury services, which will over time expand in order to envelop most corporate finance services required by our clients, including deal financing.

So, in short [NEXT.Exchange](#) is taking stock exchanges to the NEXT level, making it substantially easier to acquire stocks through Blockchain technology. By providing a full history of trading, so decisions can be easily made, even for the most inexperienced traders. With just a few clicks, users will be able to get the best, most promising shares, and enjoy dividends.

# NEXT ICO

Although we greatly value our shareholders, we want everyone to have the opportunity to become involved in the early stages of our exciting, groundbreaking project, and have the opportunity to generate profits while taking the first steps in the direction towards revolutionizing the stock market and corporate finance industry. Exchanges work because people use them to buy and sell their (digital) assets, and the more assets our exchange platform has, the more profits will be made, which means more income goes back to our token holders.

We will provide interested parties with all of the pertinent information needed to decide on whom to follow in the industry. Such as fully detailed profile outlines depicting profits and losses throughout different time periods, historical graphs analyzing business performances and trades. Token holders will also have the benefit of being notified each time a successful trade is placed and can monitor the overall profit ratios covering various periods.

**We provide our token holders with bonus features like:**

Pool trading of fiats, cryptocurrencies, and digital assets.

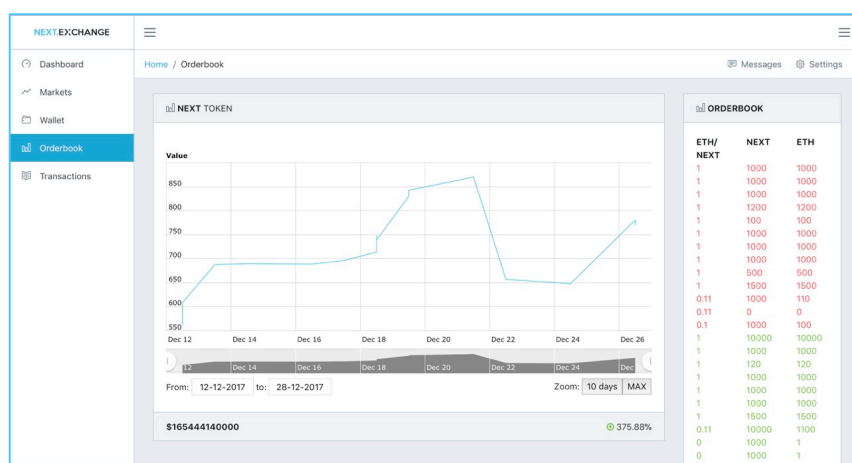

Ability to automatically follow another successful investors practices and trends.

Full range of professional analytics tools and insight credit information tools.

Token rewards for high-volume trading activities and bringing in new investors. Early access to new listings.

Token holders will have the opportunity to reap rewards for large volume trading and referrals of new investors to our platform.

To achieve this, we deployed the ERC20 token: NEXT

# TOKENSALE DETAILS

The NEXT token is a type of digital currency which will be used on the [NEXT.Exchange](#) platform (and can be exchanged between Bitcoins, Ethereum, and other digital currencies).

The tokens may also be utilized to distribute dividends to investors. If you are lucky to be in possession of NEXT tokens, then you are also in possession of a portion of our platform, and this means that you are entitled to a revenue share<sup>1</sup> that will be distributed.

A total of 96 million tokens will be sold, only 120 million tokens will ever be created.

# 20

MILLION

tokens will

and  
marketing

# DISTRIBUTION DATES

ICO Nov 20 – Dec 31.

1 ETH=1000 NEXT (no bonus)

Minimum investment 0.1 ETH.

ETHER: 0x1bf357bb34bdbce6dad4c0fc387db871cec6c8c2

<https://next.exchange/tokensale>

<sup>1</sup> Dividends can be paid quarterly to token holders, starting three months after the token allocation.

<sup>2</sup> Note that the unsold tokens will not be considered in the distribution. The minimum investment needed to be raised in the token sale is set to be 3000 ETHER. We are expecting that most of the investments will be allocated to development as well as legislative compliance activities.

# PROVABLE, FAIR PROFIT SHARING

NEXT.Exchange will share its profits with token holders. Though, NEXT.Exchange services need to have certain centralized elements for its launch, we strive towards decentralization and the minimization of trust related issues.

All NEXT.Exchange trades will be publicly reported and visible in the token holder section of our website. This is a standard practice for contemporary cryptocurrency exchanges and is also a requirement for absolutely all regulated exchanges.

To verify the integrity of our trade data, users will be able to check the trades they made in the published trade data section of our website. Furthermore, all completed trades receive a sequential trade ID number, which ensures that there are no gaps in the compiled data.

Dividends will be paid out on a quarterly basis. Based on these quarterly results, NEXT.Exchange will load the ETH amount of dividend payouts onto a smart contract. The smart contract will contain a table of dividend distributions taken as a snapshot on dividend declaration dates. Token holders will then proceed to query the smart contract dividend distribution function to move dividends from the wallet in which the tokens are stored at the time of the snapshot. The smart contract will proceed to pay out dividends to the wallet that made the request after validating all of the provided information.

If the snapshots of the token holders do not match the dividend payout amounts at 100% validity, the smart contract will refuse the payout request. This means that either all dividends will be paid out fairly and accurately or no dividends will be released.

NEXT.Exchange analysts will monitor real-time dividend payouts as micro transactions. However, the Ethereum network<sup>1</sup> does not currently scale to such small, high volume, transactions. Therefore, this will become a readily available option when the Ethereum network gains the capability to receive shares<sup>2</sup> and lightning network capabilities<sup>3</sup>.

<sup>1</sup> [www.github.com/ethersphere/swarm](https://www.github.com/ethersphere/swarm)

<sup>2</sup> [www.github.com/ethereum/wiki/sharding-FAQ](https://www.github.com/ethereum/wiki/sharding-FAQ)

<sup>3</sup> [www.github.com/raiden-network](https://www.github.com/raiden-network)

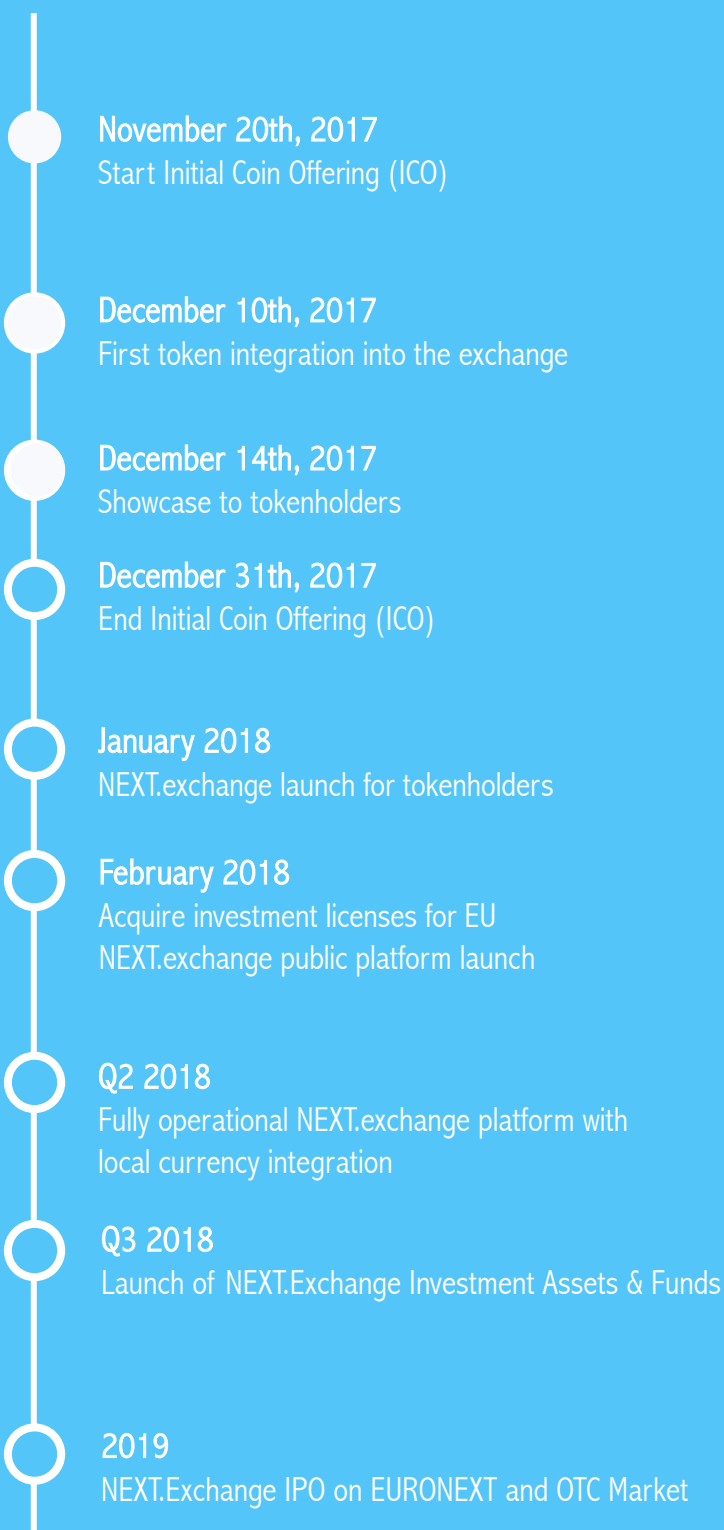

<sup>1</sup> Dividends can be paid quarterly to token holders, starting three months after the token allocation.

<sup>2</sup> Note that the unsold tokens will not be considered in the distribution. The minimum investment needed to be raised in the token sale is set to be 3000 ETHER. We are expecting that most of the investments will be allocated to development as well as legislative compliance activities.

# ROADMAP

The next two years will be rather busy for NEXT.exchange.

The token sale launch is set for November, followed by expansion into other continents. Gradually, we will drastically improve the functionality of the platform to its perfect form by 2018 when we expect to have a full entrance into the global cryptocurrency exchange market.

# CONCLUSION

Cryptocurrencies will definitely change the world and **NEXT.Exchange** wants to be there when that happens by offering an innovative and secure platform, where users around the world can securely and easily exchange assets.

Every day, cryptocurrencies are gaining more and more legitimacy and the number of countries and companies that are starting to accept them are also increasing on a daily basis. Services like Reddit, WordPress, Baidu, and other online businesses like pizza chains, grocery stores, gyms, entertainment centers, and even vending machines are opening up to crypto. Binary trading platforms and Forex brokers have already begun allowing trades via bitcoin.

We are living during a period of a financial revolution! Bitcoin and Ethereum are pioneering the new cryptocurrency era. However, the diverse cryptocurrency scene falls short in convincing public masses of its legitimacy and safety.

**NEXT.Exchange** has the ability and capability to guide the cryptocurrency market into a new age. An age which gives both novices and experienced traders a peek into and a piece of history in the future of corporate finance practices.

With this token sale and our passion, we offer you a new business model, that in our vision drastically changes the world of stock trading and corporate finance markets for the better so that innovative and groundbreaking organizations can create more value and profits for our token holders.
