CoinCasino Tokens

Decentralized software product CoinCasino issues a token (crypto currency) - CoinCasino (CAS). The Token will be offered at the ICO CoinCasino event and provide the buyer with the rights stipulated in the "Terms and Conditions" document.

Company

EXCELSIOR INTERNATIONALE s.r.o. - company established on December 12, 2016 in accordance with Czech law, company code on the register 14167123, official address: Chotěšovská 680/1, Letňany, 190 00 Praha 9, Czech republic.

ICO (Crowdsale)

Fundraising, which will provide the opportunity to purchase CoinCasino tokens at a discount from December 27, 2017 (13:00 UTC) until February 15, 2018 (12:59 UTC).

CoinCasino

Software product (decentralized application) created by the Company. CoinCasino is a set of open and burglary-resistant smart contracts deployed on the basis of blockchain Ethereum.

A discount

Preferential rate at which Investors will be able to purchase CoinCasino tokens in the ICO sales process.

Investor

Member of the ICO acquiring the Company's CoinCasino tokens during the event

Terms and Conditions

Section "Terms and Conditions" of this document, including any duly completed additions to it.

Web site

The ICO event website, supported by the Company www.ccasino.io

Whitepaper

This document as a whole, including "Terms and Conditions".

Note to Investor

Read this document in its entirety before beginning to act. You understand that investments can be unregulated. You are aware of the high degree of risk if it comes to the prospects of development. Consult an expert if you have any doubts about the contents of this document. The purpose of this document is to present the CoinCasino project to potential investors in connection with the proposed pre-sale of tokens. We hereby provide relevant information that will enable potential investors to determine, by careful analysis, the need to purchase CoinCasino tokens.

This document is the only legal document submitted by the Company in open access in connection with the provisions of CoinCasino Crowdsale. This means that the document contains all the relevant information about the Company, its product offerings, and the "Terms and Conditions" in which you can purchase the product of CoinCasino tokens.

1. Overview

We are CoinCasino and we are revolutionizing the gaming industry, using the power of blockchain in the online games market. We know why blockchain games could not get into the mass audience and this document will give you an overview of how we make decisions that guarantee that the future of online casinos is fun, speed and honesty.

1.1. Platform and benefits

We are pleased to inform you of the exciting online casino platform CoinCasino.

We use the following technologies and rules in development:

- HTML5 for developing a browser version of the casino
- Develop a mobile application for two major platforms iOS and Android
- High speed of operation and response
- Distributed load across 6 data centers around the world
- Thought-out server architecture for security and stability
- Casino will be completely independent and decentralized at startup
- Open architecture will provide our platform for other projects in the field of online casinos

Our main differences and advantages from other similar projects:

- The first gaming platform based on blockchain technology with real capital in USD. Part of the funds collected during the ICO will be stored in fiat money to pay players and increase the capitalization of the platform.
- The first gaming platform based on blockchain technology, which allows players to receive a prize in fiat money. You do not need to think about converting and withdrawing your winnings.
- The first gaming platform based on blockchain technology, which has a valid license for financial transactions in the European market.
- Obtaining a real casino license, to create the world's first hybrid online casino platform. In CoinCasino, players will be able to use both digital currency and fiat money. We are confident that this step will lead to an increase in the cost of CAS and the overall capitalization of the project.
- CoinCasino is targeted at a wide audience of Players.
- The security of CoinCasino technologies with patents for use (in the future)

2. Team CoinCasino.

Experience in development and finance

The founders of CoinCasino have experience in programming and finance for more than 10 years. We know how to turn a game into an online casino into a high-quality and exciting gameplay and know how to create a blockchain-based platform that will give you this opportunity.

The core team consists of six developers and has already completed the first stage of development of CoinCasino in HTML5. Our technology proves the success of the concept and development of online casinos. The advanced capabilities of the CoinCasino platform act as an inspiration to launch an effective system for players from around the world.

In our team there are experienced financiers who are responsible for the mathematical model and efficiency of profitability of online casino profits. The company-developer has a real license to conduct financial activities in Europe.

In the future, it is planned to create the world's first hybrid platform for online casinos, combining the reliability and transparency of the game with blockchain technology and playing for real fiat money.

An important advantage of our concept is the ability to run games on the CoinCasino platform directly in the browser on desktop and mobile devices without the need to download the application, completely eliminating this inconvenience. However, we will offer mobile applications in countries where it is not prohibited by law.

3. Use:

Launch Casino in two clicks

We are developing a platform for launching many online casinos, placed by operators and organizers anywhere in the world.

Operators and developers who have acquired a license on the CoinCasino platform will be able to create completely individual projects for any requirements of players for traditional gambling such as slots, blackjack, roulette and baccarat. We want anyone who wants to run an online casino could do this on the CoinCasino platform.

We are fully confident that every game is fair and trustworthy. Unlike all existing online gaming platforms, the CoinCasino license allows the operator to easily create and host a casino under his own brand on a single CoinCasino platform.

When the operator is ready, the platform will allow him to run the casino in just a couple of clicks.

3.1. Experienced Developer

The CoinCasino platform is created by our developers taking into account the peculiarities of gambling. The already created architecture and principles of CoinCasino work demonstrate the advantages of our platform. No other platform to date can offer you instant games for real money and a crypto currency on blockchain technology.

3.2. ENS Readiness

Primary investors and CoinCasino founders have already purchased domain names, including blackjack and poker for exclusive use after the launch of the CoinCasino platform. Full information on how to access these domains and start playing will be published in the first quarter of 2018.

4. Instant, harmonious gameplay

To date, none of the developers have been able to create games based on blockchain, which can bring you real pleasure from the process.

Nobody wants to wait a minute (or longer) until the result of the game combination is handled by the blockchain. The reality is that at the moment game combinations in online casinos are generated even before the start of the game session.

The CoinCasino patent describes a technological process for creating instant chains of generating game combinations on a blockchain. This is a unique advantage in the online casino market. We are confident that the speed of the game is a key indicator in the development of online casinos and allows you to achieve a high level of loyalty, in which the player is ready to return to the casino again.

We created a browser-based online casino platform that uses the HTML5 and WebGL standards both on mobile devices and on personal computers to provide unrivaled 3D graphics for a streamlined gameplay and user-friendly interface.

Access to the online casino is possible through the browser or through any mobile device. That is, there is no need to install special programs, which traditional operators usually require. Thus, practically any temporal and geographical restrictions are eliminated.

5. Our competitors and we

The current state of online casino projects based on blockchain shows that their developers did not take into account the slowness of creating chains of blockchain.

Also, the resource consumption for each operation inside the casino remains unclear. According to our calculations, current projects bear large costs for calculating each rate. Delays in calculations can reach up to 30 seconds, which is not acceptable for a comfortable gameplay.

Please note that all completed ICO in this subject, have not reached the launch stage! Developers already after the collection of money realized that the implementation of online casinos rests on the slowness of creating blockchain and technology of smart contracts.

We offer a different approach

Our goal is to create a cost-effective platform for online games that provides a repeat gameplay without adding unstable transaction costs. Considering the growth of ETH prices, we have developed a technological solution that offers rates less than 1 / 100th of the current value of the industry.

Typical costs of competitors today can exceed 10% for a bet for players, our goal is 0.1%.

We intend to create the optimal solution with transaction prices with the unique patented implementation of the Channel-Channel technology developed specifically for online games. We call this technology the Approved Channels.

An Approved Channel is an established channel that is open for the duration of a game session, supporting user game messages between the client and the CoinCasino server.

Since the gaming session is instant and can include hundreds of bets, our costs are an order of magnitude lower than our competitors.

With a detailed description of our server architecture and technical solutions you can find in the document "Technical description of the project."

6. Team CoinCasino

The CoinCasino project is implemented by a large number of experts - like-minded people. Some members of the team for a long time are professional creators of other casino projects, others together have successfully worked on several projects on blockade. Today we decided to join forces and break into the online casino industry.

7. Mechanism of CAS Tokens

The currency of the online casino CoinCasino is the CAS token. The main method of interaction with intellectual contracts CoinCasino - CAS token: players make bets - they get a win in CAS or real money. The possibility of gaining and exchanging tokens within the platform is one of the main advantages of CoinCasino.

CAS is used in several ways:

- CAS is the only token used to purchase in-game credits and, therefore, the only currency for online casino games on the CoinCasino platform.
- You can start playing with real money, exchanging directly inside CoinCasino, without involving third-party exchangers or exchanges.
- All types of operations within the CoinCasino platform are carried out in CAS tokens.

7.1. Issuance of CAS

Since the CAS tokens will be the main currency of the CoinCasino platform, their acquisition will be widely available from the time the online casino was launched by CoinCasino.

Rules of issue:

- Creating CAS tokens is a one-time event before the ICO and there will not be any additional tokens subsequently.
- Over time, the CAS token will increase its value by providing CoinCasino online casinos with real money and attracting new players.

7.2. Token CAS: ICO

The attracted funds will be used solely for the realization of our plans. Only by attracting the necessary amount of money, the development team wants to create trust and prove their capabilities primarily for players and investors.

The CAS Token will be used for all platform activities, including betting, lending, paying players and compensation to interested parties. CAS will be created on December 27, 2017 at 14:00 UTC.

The value of CAS will increase after the launch of the online casino will begin to attract players from all over the world.

ICO start date: December 27, 2017

End date of ICO: February 15, 2018

Price: 100 CAS / 1 USD

Bonus period: up to 150 CAS / 1 USD

CAS Creation will end 4 hours after the release of 1 200 000 000 CAS or 27 December 2017 at 14:00 UTC, whichever comes first.

Trust: 22% of CAS, not intended for sale, but issued in the ICO process, will be held in trust before launching the online casino.

7.3. Description of the CAS issue

Creation: CAS tokens will be created at a time and distributed throughout the ICO.

Number of tokens: 1 200 000 000

Price: 1 US dollar for 100 CAS tokens.

Deposits: Payment will be accepted in Ethereum. Investments in fiat money will be received on the settlement account of a company that has a valid license to conduct financial activities in Europe. We are ready to conclude legal contracts with large investors. For small investments in real money will be published an offer with a description of our responsibility to investors.

Founder: the developers and founders of CoinCasino will receive 22% of the total number of tokens.

Advisor: CoinCasino advisors will receive 1.5% of the total number of tokens.

ENS protection: we purchased CASd.eth to help protect CAS token buyers from Ethereum fraud.

7.4. Terms of ICO

- Purchase of CAS tokens is carried out only through the specified website.
- Investors can purchase CAS tokens only for Ether (ETH).
- A 33% discount will be available on December 27, 2017 (14:00:00 UTC).
- The discount will be valid for at least 14 days after the start of the event.
- The discount will remain in effect until either a maximum amount equal to 20,000 ETH is collected or until the maximum time period of the event is 14, whichever is the earlier.
- The initial price of the CAS token will be 1 USD for 100 CAS before the validity period of the Discounts; the discount is 33% under the conditions described above, and then at the end of the validity period, Discounts will be returned to the original price.
- If within the specified maximum period of time the target amount is not collected, Investors are entitled to sell their Company CAS tokens at the purchase price.
- With respect to each investor, the Company will make a decision based on its own reasonable judgment, if it is suspected of fraudulent activities or does not comply with the terms of the ICO, financing and purchase of the CAS will be refused.
- 100% of the CAS tokens in circulation for an unlimited period of time give the right to profit on the project. The profit is added to each transaction in the power pool of the smart contract, and can be requested by the token holder through the power-down procedure. The power-down procedure is paid to the holder 10 in equal installments within 3 months. When the power-down procedure is implemented, the initial amount of CAS involved in the power-up procedure and the amount of profit during the period of possession are paid to the holder.
- Owners of CAS tokens should have the right to use them in any legal way, including without limitation: sale, donation, pledge, transfer (receipt) by inheritance, deposition, etc.; The company intends to create a list of CAS tokens for all recognized exchanges of crypto currency.
- The Company guarantees that each CAS token will be unambiguously accepted as a qualified currency for rates on ccasino.io.

7.5. Key dates and information

Prices: the prices for Ethereum and will be set for a period of crowdsale.

Final prices: The prices for CAS tokens will be published at 13:00 UTC on December 27, 2017.

Ethereum Address: 0x8cbac609Bd23358E6F0D8b637fD08aA924BEABeB

ERC20 Transfers: All tokens issued for ICO will be transferred to investors ERC20 within 12 hours after the completion of the ICO event.

All CAS tokens, which are in trust with the founders, will be offered for sale at an auction after the launch of an online casino. CAS tokens not sold during the ICO will be distributed among investors on a pro rata basis.

7.6. The principle of transferring and using CAS tokens

Evaluation of the possibilities and security of ERC20 in Reddit indicates that ICO participants may face the risk of losing their crypto currency in the course of their operations and the slow response of blockchain.

Traditional methods of preventing fraud, such as confirming a real identity or blocking suspicious accounts, are not feasible in a public blockade because of its global nature and the use of pseudonyms.

A contract with a symbolic contribution instantly generates markers during a credit event, leading to a delay in transaction processing and low security of transactions.

ERC20 disadvantages are as follows:

- The Ethereum block diagram is too slow to support a large demand during the ICO process
- ERC20 points do not trigger events outside their own storage token and therefore can not run CAS creation directly during the ICO process
- Not all tokens derivatives in the chain can be such, will be mapped to each block.

We carefully examined all the factors and decided to minimize the load on the blockchain during the ICO, increasing the sensitivity of the server after the completion of the ICO event, using investor verification and CAS exchange.

To be able to work in such an environment, we use crypto-economics, a development principle that combines cryptography and game theory to create systems that demonstrate a set of economic penalties and incentives.

The following identification components are used to use CAS during the game:

Identity and reputation. When registering, users create a pair of keys - public and private - in their browser, as well as the contract id in the blockroom. With the help of these keys, users use these keys at every action during the game, they are publicly available and can be checked for fraud and collusion. With the help of the id contract, users can issue and receive acknowledgments, earning their reputation through them.

Guarantee amounts. CAS acts as a player's connection to the casino, as they are blocked for a certain time and can not be transferred. CAS can be reduced by identifying a scam.

Limited access. Access to games with high profitability can have players who own CAS and have a fairly good reputation.

With such components, we can evaluate various configurations that can offer the most secure and attractive game.

7.7. Solution for CAS Server

The bit-packing and compression technology was first used in the DAO return contract, and then in the TokenCard TKN. Using innovative compression methods for bit packaging, hundreds of individual CAS token credits can be released into a single transaction call. The server will be able to generate a log of each of the three types of deposits - Ethereum, and publish transaction logs instantly.

The storage of transaction logs in the public domain will allow for the audit and verification of the compliance of server multiminter credits and committed transactions. After receiving confirmation of the ERC20 contract, the transfer of CAS tokens to investors will be carried out immediately.

7.8. Crediting BitCoin and Zcash

Since we believe in simplicity, we will accept BitCoin and Zcash directly on the assigned addresses during the ICO phase. However, these blockchain, or rather their nature can not provide us with the address of the Ethereum credit for the CAS token.

The CAS tokens purchased by such transfers will be combined into one Ethereum account controlled by CoinCasino. These CAS tokens will only be sent to the party that can prove that they belong to the sender by signing the message with the private key of the outgoing BitCoin or Zcash address. There are no exceptions to this rule.

If you are not sure of your ability to create signed messages using bitcoins or Zcash, we strongly recommend that you contact Bitcoin Suisse on the Internet at <https://retail.bitcoinsuisse.ch/en> or Shapeshift at <https://shapeshift.io> in advance use their services to convert credit to BitCoin or Zcash to Ethereum.

7.9. Investing with fiat money

We are an open and honest company. That is why we provide an opportunity for our future partners to invest in the CoinCasino project with fiat money.

Transfers will be accepted on the settlement account of our company, which has a license for financial activities in Europe. Control by the central bank of the Czech Republic does not allow us to conduct an honest game with our investors. For large investors, we offer the signing of an individual contract.

To invest small amounts, all legal aspects will be described in the offer contract.

8. Contract details of CAS Tokens

The token contract is carried out according to the ERC20 standard with several additional functions.

The contract is divided into three separate parts:

- The "Front End" contract is a permanent token address.
- The "Controller" contract is created and linked by the Front End contract.
- The "Legger" contract keeps the load balancing of the server and prevents various failures.

8.1. Full review of Token contract

Token's source materials and associated audits will be published by December 27, 2017 in Etherscan.

9. Analysis of the online games market

Income from gambling in 2015 approached 400 billion US dollars. The share of Asian countries accounted for about a third of all income from gaming. Approximately 10% of the global gaming market, almost 40 billion dollars, is generated by online casino revenues, which since 2010 show an increase in yield by 50% each subsequent year.

H2 Gambling Capital predicts that the global common (traditional and online) gaming market will be close to 600 billion US dollars by 2020. With more than 6 million adult players around the world to date and an estimated growth in the number of players to 10 million by 2020. The gaming market as a whole is growing rapidly, and the virtual segment of online casinos is growing faster than traditional casinos.

We believe that the online games industry can evolve even faster - in line with the growth trajectories of other digital industries such as downloadable music, books, online stores and taxis that all benefited from the destruction of traditional business models by adopting innovative capabilities and technologies. It should also be remembered that historically, online casinos are subject to strict regulation by governments of different countries under pressure from traditional casino owners. The casino on the blockchain platform successfully bypasses this limitation, we can work anywhere in the world.

The technology developed by CoinCasino (double generation of random numbers between several numbers chains) offers several advantages over the classical model of a single generation of random numbers for the entire game session. In particular, our platform based on blockchain allows us to ensure a fair, orderly game and withdrawal of funds. Does not suffer from the speed, nor from transaction costs, which hindered others.

9.1. Do not trust traditional online casinos

The stories of deceptions and bankruptcies of large online casinos have undermined the players' confidence in the online games market. The collapse of Full Tilt Poker in 2011, Absolute Poker and UltimateBet in 2007 and 2008 pushes new players away from classic casinos to the online world, which generally hinders the further growth of the industry. Creation of an online casino based on blockchain will restore the confidence of players and the ability to additionally profit by buying CAS tokens.

Traditional online casinos can work quickly and smoothly, they still have system flaws.

No online casino discloses the principles of the operation of random number generators. They believe that this will affect the security of the operation of such a casino. However, often, this is done so that the generator works "in the right way." Many players have more than once convinced that the generator never gives in the long run the casino lose.

There is no way to check how the generator works when the classic gaming machine is running. It is important to remember that to date, none of the players can check how the casino works, where its servers are located, whether deposits of players are securely stored. Most importantly, no one is responsible if the online casino is deprived of a license or will simply be closed. Often, even large online casinos have no legal status and are always located on island offshore.

Casino CoinCasino eliminates the player's mistrust of random number generators, this is the very essence of blockchain technology. We eliminate the players' doubts about the integrity of the game. The very essence of the release of CAS tokens and our interest in its growth on the exchange will not allow us to influence the game in any way. Our system is provably fair, transparent and subject to comprehensive audit. Our players will always be sure that the casino does not intentionally play against them.

9.2. Mobile app

In 2015, the use of mobile applications for casino games accounted for 30.5% of the total online casino market, almost tripling the number since 2010. It is predicted that the use of mobile applications for playing in the casino will continue to grow, reaching by 2020 43.3%.

However, we must remember that all mobile applications with the ability to play for real money have been removed from the application stores. Some online casinos encourage potential players to disable virus protection on their phones, and write instructions how to bypass official stores to install such applications. This is a huge risk for the players, not to mention the inconvenience and not the ability of many users to follow such instructions.

CoinCasino completely bypasses the distribution model through official application stores. If you are not an experienced user, run our casino directly from the browser. You will not notice any difference compared to starting from a classic application. We use only HTML5, no additional modules are needed. If you want to still rely on classic applications for your convenience, we will suggest that you download the application from the official casino website. This application contains all of our technologies and guarantees for fair play and the security of your deposits.

10. ROADMAP

May 1, 2017 Forming the CoinCasino team

July 2017 Development of technical solutions for implementation

September 2017 Ccasino.io launched on Ethereum

September 2017 Preparation of ICO

December 2017 Launching the ICO

February 2018 ICO completed

March 2018 The first games CoinCasino

April 2018 Expansion of development and marketing teams

September 2018 Live tournaments with professionals

December 2018 Global marketing campaigns, including offline tournaments

11. Terms and conditions

We want to be completely honest with our investors and players. Therefore, we have a suggestion to read some rules and limitations.

11.1 General

11.1.1. These Terms and Conditions constitute a legally binding act between the Investor and the Company (also individually referred to as the "Party" and jointly as the "Parties").

11.1.2. These Terms and Conditions determine the mutual rights and obligations of the Parties in connection with the purchase of CoinCasino Tokens during the Crowdsale event.

11.1.3. In accordance with these Terms and Conditions, the Company sells and transfers, and the Investor buys and accepts CoinCasino tokens.

11.1.4. Sections of this White Paper are an integral part of these Terms and Conditions.

11.2. Statements and Guarantees from the Company

11.2.1. The company has all the necessary powers, opportunities and rights (corporate and others) in terms of owning and owning their business.

11.2.2. The company does not participate in the conduct of Crowdsale in order to achieve illegal goals.

11.2.3. The company has all the necessary powers, capabilities and rights and has taken all the actions necessary to obtain permission for their implementation and transfer, as well as to fulfill the provisions of this document Terms and Conditions.

11.2.4. For the execution, transfer and implementation of these Terms and Conditions, the Company was duly authorized to perform all necessary and required actions, and implying appropriate performance and transfer from the Investor, this Document constitutes legal, valid and binding obligations for the Company that may be enforceable in respect of it in accordance with the provisions of this document.

11.2.5. Execution and transfer of these Terms and Conditions, as well as the implementation of these Terms and Conditions by the Company, including the sale and transfer of CoinCasino Tokens, require the consent, approval, authorization or other action of the relevant government body or any other person, or the filing of an application, or the address of any government body or any other person, and no such action will violate any law applicable to such a Party, will not violate any particular eniya any governing document or violate any agreement to which the Company is.

11.2.6. All CoinCasino Tokens are free from any encumbrances or rights of any third party.

11.2.7. There are no unfulfilled options, guarantees, purchase rights, subscription rights, conversion rights, rights of exchange or other similar rights, voting trusts, transfer of votes, powers of attorney or other contracts or obligations with respect to Tokens of CoinCasino.

11.2.8. The Company does not manage any CoinCasino Tokens by proxy in favor of any person, directly or indirectly; no third party has any rights with respect to the CoinCasino Tokens.

11.2.9. There are no legal proceedings, claims, prosecutions, claims or unfinished investigations that, to the best of the Company's knowledge, are exposed against any CoinCasino Tokens or against the Company and who are trying, or in fact, to prevent the Company from fulfilling these Terms and Conditions.

11.3. privacy policy

11.3.1. The Company can receive information about the Investor as follows:

11.3.1.1. If the Investor provides such information (for example, when registering on the Website, subscribing to our updates, responding to surveys, filling out forms, etc.).

11.3.1.2. Automatically (for example, log information, device information, usage information, information collected by cookies or other tracking technologies).

11.3.1.3. From other sources (as indicated on the corresponding third party authorization screen).

11.3.2. The company can use the information, in particular, to:

11.3.2.1. Administer the services of the Company.

11.3.2.2. Develop new products and services.

11.3.2.3. Personalize the Website.

11.3.2.4. Send to the Investor technical notifications, as well as service and administrative messages.

11.3.2.5. To inform the Investor about products, services, promotions, events and other news and information.

11.3.2.6. Track and analyze trends, uses and activities related to the Company's services.

11.3.2.7. Identify, investigate and prevent fraudulent transactions and protect the rights and property of the Company or others.

11.3.2.8. Verify compliance with the Terms and Conditions governing the use of the Website.

11.3.2.9. Keep this information for the duration of these Terms and Conditions, as provided by applicable laws, or for a longer period - in accordance with the Company's internal policy.

11.3.3. The company can provide information, in particular:

11.3.3.1. With the Investor's permission, including certain information on blogs or other online forums, specified by the Investor in advance.

11.3.3.2. Upon the lawful request of the relevant authorities.

11.3.3.3. To help providers who work for us (for example, to verify identity, support, payments, etc.).

11.3.3.4. If we consider the Investor's actions not to comply with the Terms and Conditions or the Company's internal policy, or in defense of the rights, property and safety of the Company and others.

11.3.3.5. In connection with, or in the course of negotiations on the merger, sale of the Company's assets, financing or the acquisition of all or part of our business by another company.

11.3.3.6. Existing or future partners of the Company

11.4. Investor's Obligations

11.4.1. DO NOT violate or help any party to violate any law, legal act, instruction, regulation or any rule of any self-governing or similar organization that requires the Investor to be its member through the use of the Website by the Investor.

11.4.2. DO NOT provide inaccurate, inaccurate or misleading information.

11.4.3. DO NOT infringe copyrights, patent rights, trademark or intellectual property rights of the Company or the Website or any third party.

11.4.4. DO NOT distribute advertising materials that are inconsistent or unauthorized for publication, intrusive advertising, spamming or conversations.

11.4.5. DO NOT reverse engineering and do not decompile any part of the Website to gain access to any source code, basic ideas and concepts or algorithms.

11.4.6. DO NOT take any action that causes an unreasonable or disproportionate burden on our infrastructure, or have a negative impact, interfere or remove any system, data or information.

11.4.7. Do NOT transmit or upload any material on the Website that contains viruses, trojans, worms, or other malicious software.

11.4.8. DO NOT attempt to otherwise gain unauthorized access to the Website, other Company systems, computer systems or networks connected to the Website, by password selection or otherwise.

11.4.9. DO NOT transfer or assign any rights granted to the Investor by virtue of these Terms and Conditions.

11.4.10. Fulfill any laws and regulations that may be relevant to the acquisition and subsequent storage of CoinCasino Tokens.

11.5. Limits of financial responsibility of the Company

11.5.1. Отсутствие защиты инвесторов. Данный документ не имеет отношения и не подпадает под действие каких-либо законов или нормативных актов любой юрисдикции, предусмотренных для защиты Инвесторов.

11.5.2. Price and Liquidity of Tokens of CoinCasino. The Company shall not be held liable and shall not accept any financial responsibility, liabilities or other liability of any nature for changing the value of CoinCasino Tokens to the extent permitted by applicable law, regulation, purchase of CoinCasino Tokens. In no event shall these Terms and Conditions transfer to the Investor the rights to the intellectual property of the Company, including intellectual property rights in respect of the Website or its elements

12. Legal restrictions

We prohibit the use of the CAS token anywhere, except for the online casino CoinCasino. This token will be released exclusively and only for playing in an online casino. The CAS token will be placed on the exchange in free sale and purchase.

Players are aware of the fact that the game in the online casino carries the gaming risks. No casino in the world guarantees its players a win. Our software may be subject to hacker attacks, but we will do our best to ensure complete security and anonymity of the data.

The economy of tokens is exciting, and also incredibly innovative. But any tokens can be influenced by regulatory bodies, including restrictions on ownership, use or exchange. Regulators or other circumstances may require a change in the mechanics of the CAS, in whole or in part. Therefore, we can revise the mechanics, comply with regulatory requirements or other government or business obligations. nevertheless, we believe that our planned mechanics will be the final version.

CoinCasino intends to apply a portion of investment money (40%) to finance software development and to eliminate cost fluctuations.
