Certain statements, estimates and financial information contained herein constitute forward-looking statements or information. Such forward-looking statements or information involve known and unknown risks and uncertainties, which may cause actual events or results to differ materially from the estimates or the results implied or expressed in such forward-looking statements. This English language White Paper is the primary official source of information about the LST Token. The information contained herein may from time to time be translated into other languages or used in the course of written or verbal communications with existing and prospective customers, partners etc. In the course of such translation or communication some of the information contained herein may be lost, corrupted, or misrepresented. The accuracy of such alternative communications cannot be guaranteed. In the event of any conflicts or inconsistencies between such translations and communications and this official English language White Paper, the provisions of this English language original document shall prevail.

## Background

Today, the global network broadcast market, adult live has occupied a considerable share. The market has reached billions of dollars. With the ordinary way of life profit different. Ordinary network live income from the commercial advertising, adult live income from the user's reward. The current adult live market exists in the main company. Such as "Jasmin, ImLive, EvilAngelLive, LivePrivates, Joyourself, XLoveCam".

These companies have their own websites, technically using the database management. All users and models of information, stored on the same server. The website distributes its own tokens. After the user to buy the token, play their favorite models. Web site by taking the model of the reward as a profit.

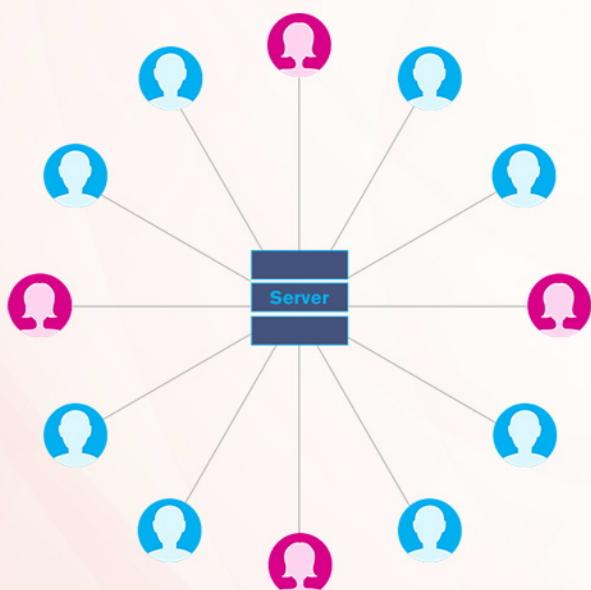

The above mode of operation, we call it "traditional model". He has many drawbacks. First of all, the lack of privacy, users and models of private information stored in the server, easy to hackers steal. Second, the model of compensation by a number of institutions to extract, income shrinking. In addition, the user recharge token, if not used, can not turn into cash, for the model, labor compensation is less than 50 or 100 dollars, you can not extract the reward.

# Problems of Live Cam-Shows industry

We investigated the operation of the traditional adult live web site, summed up the following questions.

## Lack of user anonymity

The private information of users and models is stored in the server. For example, names, ID numbers, cell phone numbers, home addresses, bank accounts, and so on, will be recorded. If you encounter insider leaks inside the site, as well as external hackers steal. A huge threat to the private property of the user and the model.

## Low rate of payments for models

At present, the network platform in the market high extraction model commission. The general ratio is 30%-50%. And you need a certain amount of model accounts to extract cash. For example, at least more than 100 dollars. And they're paid monthly, even on the first day of the month, and they don't have to wait until next month.

## The remaining tokens can not be exchanged for cash

If some of the users, the remaining tokens more, it can not change into cash, let the boss secure website.

# Solution

## Anonymous user protection

In the solution of life, the server only stores the information of the model, and doesn't store the information of the user. After the user logs in, the user is given a random key, and the user uses the key to find his model. Using block chain technology to send tokens to the trading market. Users buy tokens through the trading market to pay the service fee of the model. When the model gets tokens, they convert it into cash in the trading market.

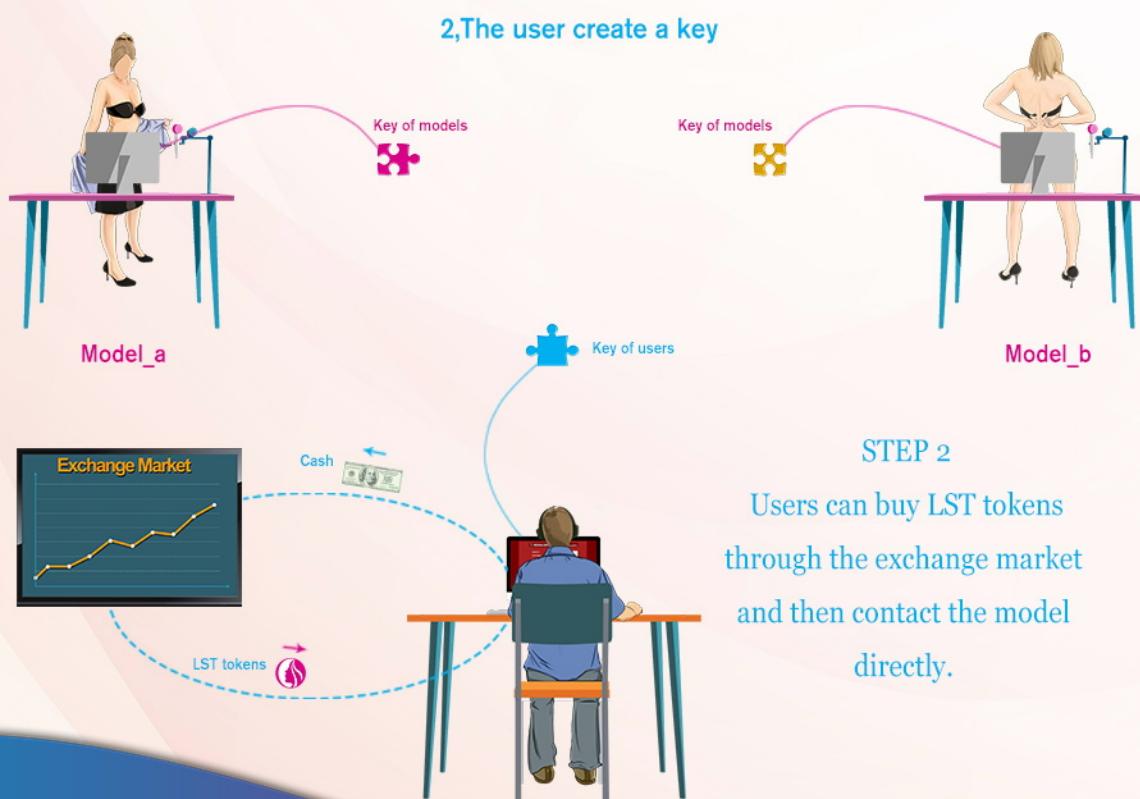

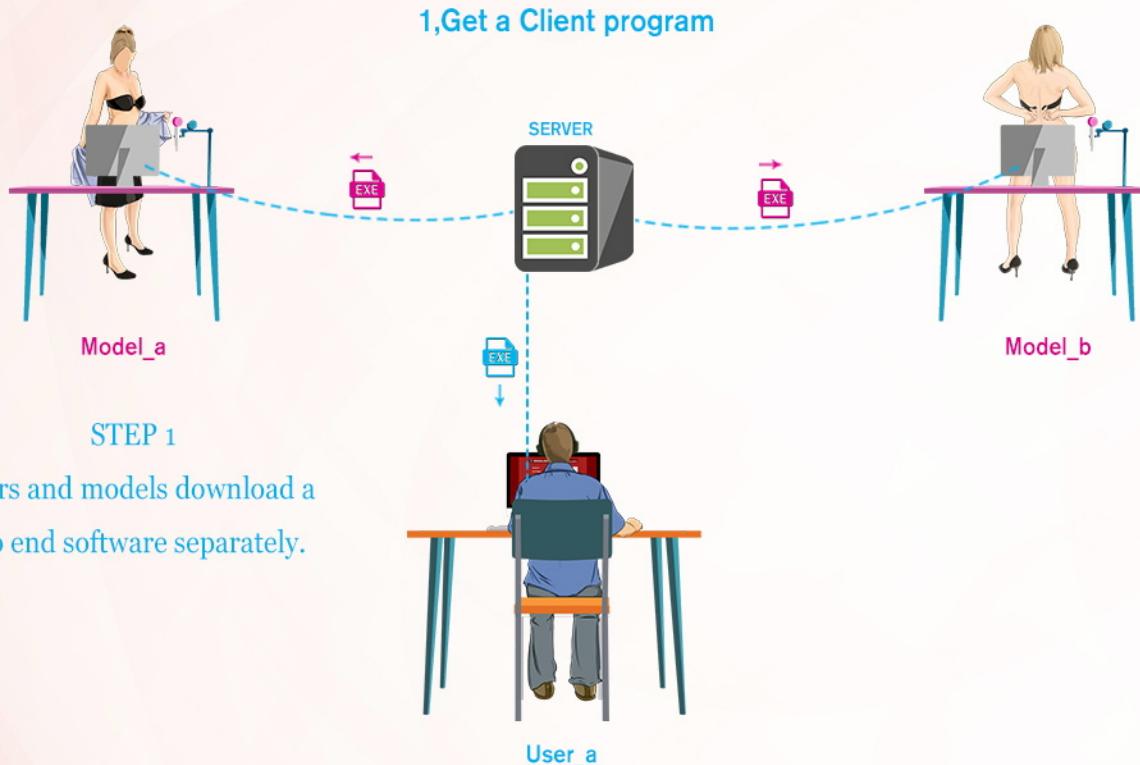

## Model can get higher rates of return

Without other financial institutions, our platform gains more revenue. We can guarantee that our model rate of return is more than 80%. And it doesn't need any waiting time.

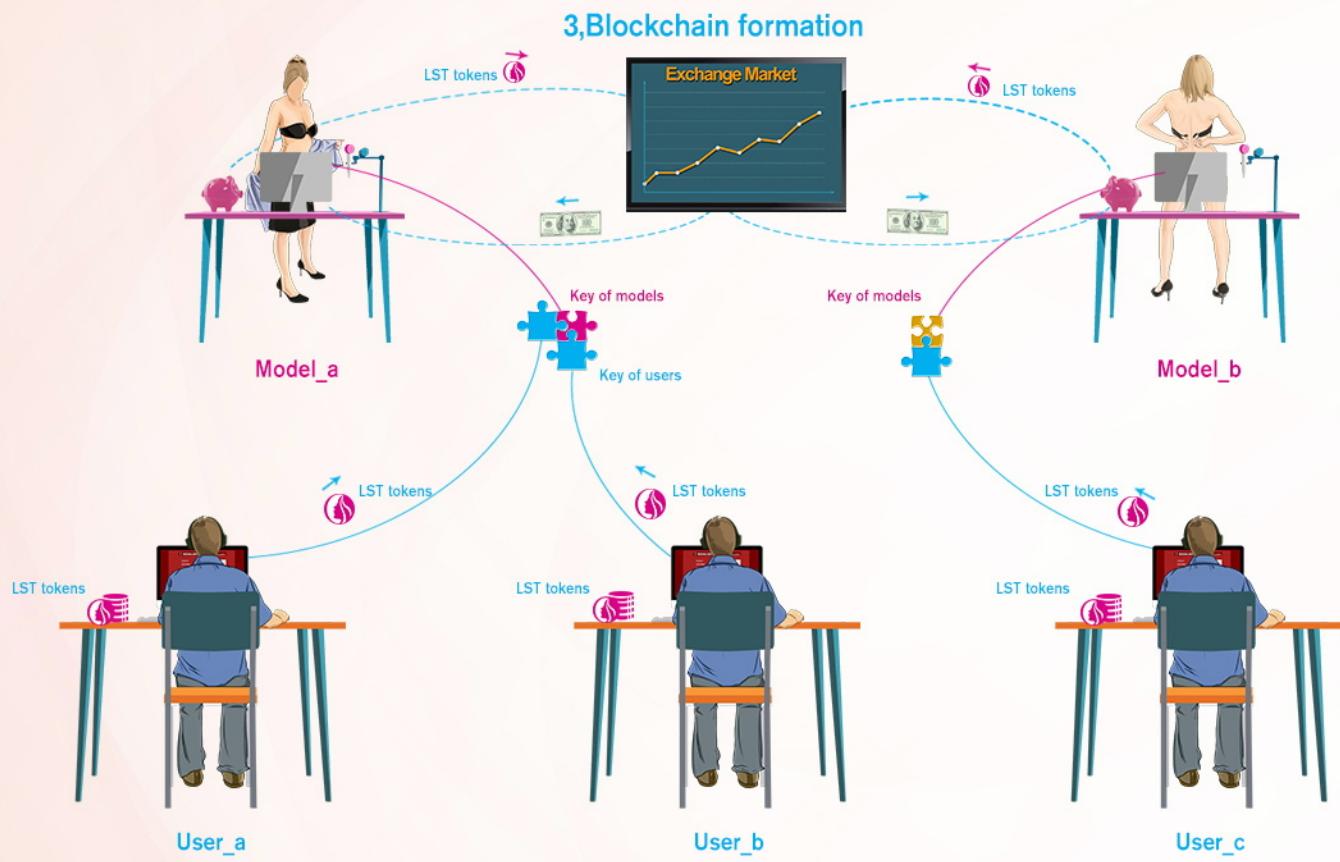

## Freedom of trade

Our platform doesn't handle user funds. The model can exchange the tokens obtained in the trading market into cash. In addition, if users want to leave, they can exchange tokens into cash in the trading market.

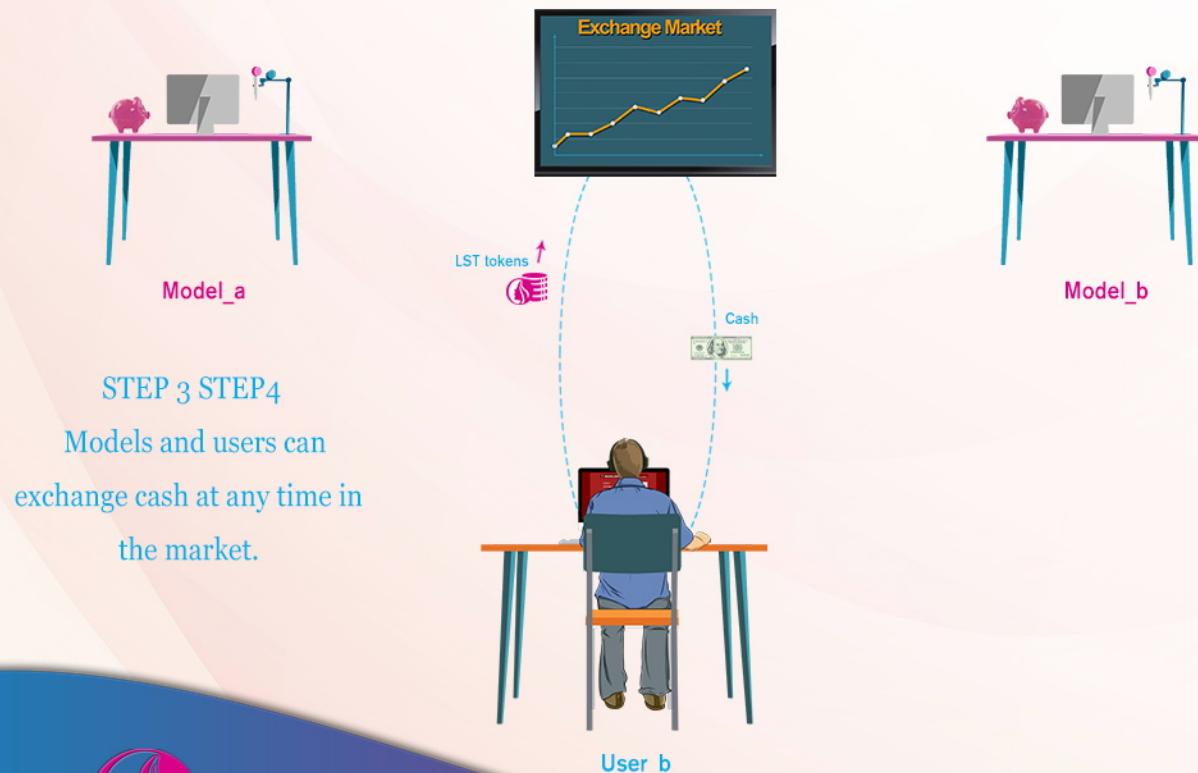

# How does LIVESHOW work?

# How does LIVESHOW work?

**4,Tokens can be exchanged for cash**

## Multi - platform system

Whether it is a desktop or laptop computer, mobile phone, and tablet computer, can run.

# FEATURES OF LIVESHOW

LIVESHOW is creating a webcam platform of a new generation, which is based on Blockchain technology. The main goal of our project is to develop an automated system with transparent structure and a variety of individual advantages in comparison to existing projects on the market.

## De centralization

There is no need to store all user information. Just need a management server, distribute client programs, and distribute keys.

## User Anonymity

Users and models are anonymous, do not store any personal information, each user will receive different key landing.

## Across websites

LST tokens are not only applicable to LIVSHOW systems, but also can be used on other live websites.

## Make money together

While users chat with models, LIVESHOW can also advertise and sell a considerable number of adult toys. The proceeds will increase the market price of tokens.

# Market development

We plan to occupy the global market in 3 stages.

The first stage

Russia, Belarus, the European Union, the United States, Canada, Japan

Second stage

Southeast Asian countries, South Korea, Brazil, Australia

Third stage

China, most countries of Africa.

## LST Token Sale

LIVESHOW tokens are offered through our official website Liveshow.io. The LIVESHOW project name is "LIVESHOW" and the token name is "LST". The total number of tokens is "100,000,000" "10,000,000" of them are on pre-sale, and the development team reserves "30,000,000".

Exchange uses ETH, smart contract using ERC20 format. The contract will be publicized at  
<https://etherscan.io/address/0x16ad3817de1ab2d45cd07b9747a6bbeb2b83ec31>

The sale starts in November 10, 2017 and ends in December 30, 2017. The total amount of tokens sold is 10000000. And the amount of funds raised is expected to be 1 million to 4 million dollars

### Bonus

The amount of LST tokens per 1 ETH

Time period	1-15 days	16-30 days	31-50 days	50 days later
Exchange ratio	5500LST	5000LST	4500LST	4000LST

### Exchange Ratio

Start date 1-15 days 1 ETH exchange 5500LST

Starting day 16-30 days 1 ETH exchange 5000LST

Start day 31-50 days 1 ETH exchange 4500LST

After the completion of the pre-sale ratio for 1ETH exchange 4000LST

Listed transactions, ICO after the end, will board the mainstream trading platform, the transaction. Unsold tokens will be destroyed on December 31, 2018.

# How to buy tokens

You have to use personal Ethereum wallets

Like MyEtherWallet, Metamask, Parity, Mist or Ledger (hardware wallet).

**Do not** use wallets from exchanges like Bittrex, Coinbase, Poloniex.

Example

To Address

**“0x16AD3817dE1aB2D45Cd07B9747a6bBEb2b83eC31”**

Amount to Send

“ 5 ” **The amount of tokens you buy**

Gas Limit

21000

Push the button “Generate Transaction”.

The screenshot shows the MyEtherWallet interface. At the top, there's a navigation bar with links: New Wallet, Send Ether & Tokens (which is underlined, indicating it's the active page), Swap, Send Offline, Contracts, ENS, Check TX Status, View Wallet Info, and Help. The version 3.10.3 is also visible. Below the navigation, the main title "Send Ether & Tokens" is displayed. The form fields are as follows:

- To Address:** 0x16AD3817dE1aB2D45Cd07B9747a6bBEb2b83eC31
- Amount to Send:** 5 (with a dropdown menu set to ETH)
- Gas Limit:** 21000

At the bottom of the form is a large blue "Generate Transaction" button.

## Add LST tokens in MyEtherWallet

Add Custom Token

Token Contract Address: [0xb1bf59a71c7cbdc13bc49addbc54190a94fb1830](#)

Token Symbol: **LST**

Decimals: **18**

Click "save"

**Token Balances**

Ahh! There are too many tokens for our poor nodes! Click "Load Token Balances" to see them all. You are limited to loading these once per minute. Try checking your balance on [https://etherscan.io](#) or [Ethplorer.io](#) instead.

( loading)      LST

**Save**

---

**Equivalent Values**

BTC:	REP:
USD:	EUR:
CHF:	GBP:

## Budget

### Distribution of tokens

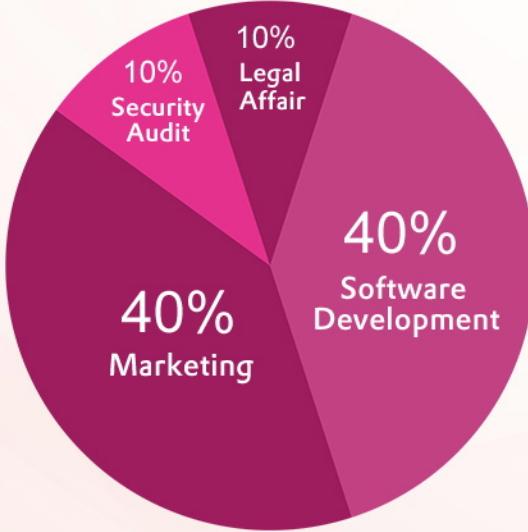

**10%** will be available for participants during the presale stage.

**60%** will be available for participants during the second round of the crowdsale.

**30%** will be allocated to the ours team.

### Distribution of funds

**50%** of the fouds will be used for promotion and marketing purpose.

**30%** of the fouds is used to develop programs, Maintain the normal operation of the system.

**10%** of the funds will be used to the development of solid legal basis for us.

**10%** Research and Application of Security Audit Technology for Measuring System Database.

# ROADMAP

# TEAM

We're from Moscow

**Andrey Safronov**

CEO

Andrey Safronov is our leader. He graduated from Moscow State University. He's both proficient in program development and video live in this industry. Websites for adult video and adult supplies. Good at understanding the needs of users, formulate appropriate marketing strategies, with a strong team management ability.

**Roman Popov**

CTO

Proficient in JavaScript and proficient in Solidity. Excels in complex structure network construction. It is also an early worker of digital encryption currency, has many years of experience in the development of trading system, and has a profound understanding of block chain technology.

**Ivan Sokolov**

Developer

Have a very rich experience in the network front-end program. Skilled use of JavaScript, reactjs, C #, Nodejs, and Ruby on Rails. Participated in the production of many large websites.

**Vladimir Smirnov**

Marketing

Familiar with online live broadcast operation, with strong market development capability. He has worked in television and media companies for five years and is very familiar with the laws and regulations in the industry.

**Anna Melnik**

Finance Manager

Anna Melnik has a master's degree and has many years of financial management experience. She is in charge of our financial work.

# Conclusion

LIVESHOW is a video broadcast industry, first of all, using block chain technology to use the system platform. There are many disadvantages in the traditional video broadcast industry.

First of all, the lack of privacy, the private information of users and models stored in the server, easy to steal by hackers.

Second, the model's remuneration is extracted by multiple institutions, and income shrinks. In addition, the user recharge tokens, if not used, can not be converted into cash, and models, labor remuneration is less than 50 or 100 dollars, unable to extract remuneration.

In view of the above situation, LIVESHOW uses a new block chain framework, after the user login server, do not fill in any information. Download a simple client software, according to the choice of model, get a key. Through direct contact with key models, paid directly by "LST" tokens, "LST" can be purchased from the market at any time. The model through the performance, get the user "LST" bounty, then "LST" through the market, change into a variety of Legal currency .

This new model eliminates centralized transactions and saves a lot of time and formality. It improves the privacy of users and models, and greatly improves the revenue of models.
